

CTSA Marks its First Year Anniversary

October 29, 2008

Cancer Treatment Services Arizona (CTSA) proudly celebrates its one-year anniversary of delivering the best in cancer care and treatment to the Casa Grande community.

On October 29, 2007, CTSA opened its doors with a goal to provide leading cancer care and treatment services to the residents of Pinal County and other nearby areas. With the aid of the local healthcare community, CTSA has been able to successfully deliver outstanding cancer care to its patients.

During the past 12 months, CTSA has launched such new modalities as Stereotactic Radiosurgery (SRS), RapidARC™ Radiotherapy, and High Dose Rate (HDR) Radiation Therapy. The facility is one of the few in the nation to offer RapidARC treatment services. Further, CTSA is the only facility in Pinal County to provide SRS and HDR services. CTSA also has added four semi-private chemotherapy chairs to its chemotherapy suite which now total eight chairs and two private rooms.

CTSA is proud to be members of the Casa Grande medical community and will continually strive to provide high quality care to its patients with its state-of-the-art technology to combat cancer.

About Cancer Treatment Services International, L.P.

Cancer Treatment Services International L.P. (CTSI L.P) is a provider of comprehensive treatment for cancer patients with a main focus on medical oncology and radiation oncology. The company was founded by a core group of physicians and businessmen with substantial experience in the development, operation and networking of cancer services on a national and international level. CTSI is able to provide innovative and technologically-advanced treatment solutions to areas of the world where therapy is currently inadequate in either quality or capacity. The company currently operates clinics and has development projects both in the U.S. and internationally.
