

CTSA Director Lectures with Industry Leaders at Radiation Oncology Seminar

December 1, 2010

Susan Vannoni, Director of Clinical Operations at Cancer Treatment Services Arizona (CTSA), lectured at an industry-leading radiation oncology billing and coding seminar held December 1st through 3rd in Las Vegas. The seminar, titled "Basic Principles of Documentation, Billing, Coding and Compliance", was an opportunity for medical billers and others involved in the administrative support of radiation oncology to enhance their knowledge on the subject and earn various continuing education credits. Vannoni was joined by industry experts, including Dr. Michael L. Steinberg, president-elect of ASTRO (American Society for Therapeutic Radiology and Oncology), in educating attendees on radiation oncology billing, compliance, and documentation.

Vannoni was chosen to lecture at the seminar based on her extensive experience in radiation oncology. She has served as Vice President of Clinical Operations, Director of a Radiation Therapy School, Manager, an Educator, and has practiced as a Radiation Therapist and a Radiographer. Currently, Vannoni not only directs clinical operations at CTSA, but also oversees clinical operations at all of Cancer Treatment Services International's clinics across the nation.

About Cancer Treatment Services International Inc.

Cancer Treatment Services International Inc. (CTSI Inc.) is a provider of comprehensive treatment for cancer patients with a main focus on medical oncology and radiation oncology. The company was founded by a core group of physicians and businessmen with substantial experience in the development, operation and networking of cancer services on a national and international level. CTSI is able to provide innovative and technologically-advanced treatment solutions to areas of the world where therapy is currently inadequate in either quality or capacity. The company currently operates clinics and has development projects both in the U.S. and internationally.
